AVAILABLE OPTIONS

Contact your local LiuGong distributor for more information on your application. Some options may not be available in all markets.

- Standard two-stage mast
- Sideshifter carriage
- Dual function auxiliary hydraulics
- Variety of fork styles
- Solid pneumatic tires
- Full suspension system
- Warning lights
- Fire extinguisher

Mast Type	Maximum Fork Height (MFH)		Maximum Load Capacity (MLC)
	mm	in	
Standard 2-Stage	3000	118.1	2045
	3300	129.9	2195
	3500	137.8	2295
Full Free 2-Stage	4000	157.5	2595
	3000	118.1	2045
Full Free 3-Stage	4500	177.2	2130
	4800	189.0	2230
	5000	196.9	2290
	5500	216.5	2460
	6000	236.2	2835

Performance values are subject to change without notice. Performance values and may vary by machine.

OPTIONS
 Contact your Liugong dealer for options available to optimize your Liugong forklift to your application. Some of the factory options available are listed here.

Available mast options include:
 - Full-free two-stage and three-stage masts up to 6.0M lift height
 - Hydraulic valve and hosing
 - Mast and fork lengths
 - Mast and fork tippers
 - Mast and fork stabilizers

Lift Height	Free Lift (FL) with Load Backrest* (2015A&2018A/2020A)		Mast Tilt Angle (F/B)	2015A Total Weight with Standard Forks		2018A Total Weight with Standard Forks		2020A Total Weight with Standard Forks

2015-20A

Electric 4-wheel Pneumatic Tire Forklifts

DRIVELINE

- SME AC Control System (1)
AC dual drive motors (brushless)
AC hydraulic motor (brushless)

The Italian made SME control system provides state-of-the-art technology for maximum performance and efficiency and features three performance modes. The SME "EYE" diagnostic software allows for quick and accurate parameter changes and diagnostic troubleshooting.

The 100% AC system eliminates motor brushes to maximize performance and minimize maintenance. The dual drive motors allow the drive tires to counter-rotate for exceptional maneuverability.

Sealed wet-disc brakes virtually eliminate down-time and expenses associated with brake adjustment and repairs.

CHASSIS

The frame structure was designed using Computer Aided Engineering (CAE) software for increased strength and durability. Open step and spacious foot room allow for easy access and comfortable operation for the operator.

Heavy duty fabricated steer axle features hydrostatic steering and tapered roller bearings for ease of operation and long service life. The cushion mounted overhead guard minimizes vibration making the operator more comfortable and productive. (2)

The spacious battery compartment allows for battery capacities of 540Ah (up to 1.8 tons) or 690Ah (up to 2 tons) for extended operation.

MAST

Our masts feature wide channel spacing and the secondary lift

chains and auxiliary hydraulics are mounted at 90 degrees behind the channels on the three stage masts for improved forward visibility. The fork carriage and mast channels have large side thrust rollers for strength, high reliability and are located for easy service.

OPERATOR COMPARTMENT

The seat side hydraulic controls combine ergonomics and simplicity to provide a cost effective and reliable system that maximizes operator productivity. Directional change is performed via the yellow thumb-switch on the lift lever for easy operation. (5)

The operator presence system provides additional protection for the operator by cutting power to the drive motors and locking out the hydraulic operation when the operator leaves the seat. A warning alarm also notifies the operator to set the park brake before leaving the machine unattended.

The full-suspension seat provides world-class comfort, which is adjustable for weight, leg room and back angle. (3)

The informative instrument panel is mounted on the cowl and features: battery level indicator, hour meter, fault code display, turn signal indicators, system warning, park brake set indicator, low brake fluid, travel speed, OPS function, steer angle indicator and maintenance due indicator. (4)

EXTRAS

The standard light package includes two front combination flood/turn signal lights and the LiuGong rear light bar which features LED turn/brake/back-up lights. All electrical components use automotive style sealed connectors for high reliability.

A STRONG FOUNDATION. A STRONG FUTURE.

LiuGong was founded in 1958 in Liuzhou, China. Since then, we have become one of the world's most respected, premier heavy equipment and industrial equipment manufacturers. LiuGong engineers simple, serviceable designs that are reliable and remarkably durable.

Today, LiuGong employs more than 14,000 including over 1,000 engineers working in three world-class research and development facilities around the world.

When you purchase a LiuGong machine, you get an easy to own, easy to maintain piece of equipment and you join forces with a company that has spent the past 50 years dedicating itself to making your job easier. Learn more about LiuGong at www.liugongna.com

LIUGONG SERVICE AND SUPPORT, LIKE NO OTHER.

We don't just provide a world-class machine; we provide all the service and support you need. With over 2,650 sales outlets, 380 dealers, 24 manufacturing facilities, 10 regional parts depots and nine global offices located strategically throughout the world we ensure rapid replacement of parts and servicing of equipment. We have all your local service and support needs covered.

With LiuGong, you know you'll get the personal attention you deserve because you don't have time for anything less.

Contact your local LiuGong Forklift dealer for more information.
